MA TRIZ Level 3 & TRIZ Champion

Robert Adunka, Dr., Ing.

TRIZ Consulting Group GmbH & Vice-President MA TRIZ
TRIZ Master Practice (MA TRIZ Level 5)

Double Certification – MA TRIZ & MIT: Explanation from Sergei Ikovenko

MATRIZ Level 3 “TRIZ Practitioner” program has established a high reputation among world class corporations like General Electric, Siemens, Samsung, LG, Hyundai Motor Company and many others. It prepares innovation TRIZ professionals that play the core role in deploying innovation culture within the company and leading innovation and invention activities. Though graduating from the MATRIZ certification programs is quite an achievement, it is not usually recognized as something equal to accomplishments in academia.

The Level 3 program that we offer, covers all the topics required by MATRIZ, but also some other TRIZ applications that allowed to obtain the recognition of Massachusetts Institute of Technology (MIT), Tufts University and a number of other prestigious academic institutions.

The additional TRIZ applications that make the program unique include:

- *Innovative Logistics (TRIZ for Supply Chains)*
- *Advanced TRIZ Patent Strategies (firewalls, patent revival, etc.).*
These topics have been included into Master-Degree programs in IP, funded by WIPO (World Intellectual Property Organization) and other TRIZ applications.

Those who will graduate from the program will obtain Level 3 Certification from MATRIZ and on top of that, a certificate from MIT indicating that the program covers all TRIZ-based courses at MIT.

This is the only program that gives its graduates double certification – MATRIZ & MIT
